

Porsche 991 GT-3 R Chassis Records

2012 – C Series Cars, 6x known. Full VIN is WP0ZZZ99Zxx

The new 991 series Porsche 911 is about to make its debut, but the sports car company from Stuttgart is making sure that its 997 series doesn't go out without a bang. Amongst customer race cars, the Porsche 911 GT3 R has proven quite popular thanks to its forgiving handling, even at high speeds. And it's mainly in this area that the improvements for the 2012 model year have been targeted. A softer anti-roll bar on the front axle reduces understeer, while new paddle-shifters on the steering wheel ensure gear changes are even quicker and simpler. Moreover, the transmission electronics, featuring an automatic throttle blip control, make it almost impossible to miss a gear and over-rev the engine. Finally, the gearing of the sequential six-speed dog-type gearbox was adapted to a higher maximum output from the 911 GT3 R's naturally aspirated 4.0-liter flat-six. Peak output has increased by 20 horsepower to 500 ponies, brought about mostly by optimization of the intake. The new Porsche 911 GT3 R will be delivered to teams around the world from November of this year, priced from 304,500 euros (approximately \$434,000) exclusive of tax. And in case you just went and bought a 2010 or 2011 version, your car can be upgraded to the 2012-spec for roughly 43,100 euros (\$61,444).
